POONAM SUTHAR

Senior Mobile Engineer | Flutter & Dart | Native Android | 9+ Years of Experience

Pune, Maharashtra, India | +91 97261 97065 | poonamsuthar22@gmail.com

PROFESSIONAL SUMMARY

Senior Mobile Engineer with 9+ years of experience building and maintaining production-grade mobile applications, including 4+ years of hands-on Flutter development. Experienced in independently delivering mobile applications end to end, from requirement analysis and UI development to REST API integration, third-party SDK integration, debugging, and production releases.

Strong expertise in Flutter, Dart, native Android, Java, Firebase, offline-first applications, background synchronization, payment gateway integration, and speech technologies. Experienced in delivering applications across language learning, workforce management, industrial operations, e-commerce, and residential community management.

Proven experience collaborating directly with UK-based clients, maintaining production applications, implementing new features, and resolving technical issues across Flutter and native Android platforms.

CORE TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Native Android, Java, Kotlin (Learning)

Flutter: State Management, GetX, Provider, Widgets, Navigation, Bindings, Controllers, Responsive UI, REST API Integration

Architecture & Design: MVVM**,** MVC, Modular Application Structure

Backend & Data: REST APIs, Web APIs, SQLite, Local Storage, Offline-First Applications, Background Synchronization

Firebase: Firebase Authentication, Firebase Cloud Messaging (FCM), Push Notifications

Third-Party Integrations: Razorpay, Paytm, CCAvenue, PayPal, Zoom Video SDK, Text-to-Speech (TTS), Speech-to-Text (STT)

Android: Android SDK, Java, Android Studio, Location Services, Notifications, Background Processing, Camera and Media Features

Tools & Collaboration: GitLab, Azure DevOps, JIRA, Android Studio, Visual Studio Code

AI-Assisted Development: Claude, ChatGPT

PROFESSIONAL EXPERIENCE

Android & Flutter Developer

Suntec Web Services Pvt. Ltd. — Delhi Jan 2022 – Oct 2026

- Independently designed and built major features for Ezglish, a multilingual Flutter language-learning application for a UK-based client.
- Worked on the application end-to-end, including application design, Flutter development, API integration, third-party SDK integration, debugging, feature enhancement, and production support.
- Implemented interactive language-learning capabilities including hotspot images, text-to-speech, speech-to-text, word-level highlighting, tap-to-translate, pronunciation practice, social sharing, and video communication.
- Integrated platform and third-party capabilities for speech, audio, video, and other mobile application workflows.
- Worked directly with international clients to understand requirements, troubleshoot issues, implement enhancements, and deliver production features.
- Maintained and enhanced 20+ native Android applications within the Depotnet job, contract, and workforce-management platform for UK-based clients, implementing new features, fixing bugs, and resolving production issues.
- Contributed to projects including Kier Intercom, City Fiber, ONSA, Enerveo, HSEQ, and other field-service applications.
- Worked across multiple production applications involving job management, workforce workflows, field operations, and order management.
- Used AI-assisted development tools including Claude and ChatGPT to accelerate development, debugging, refactoring, and code improvement.

Android & Flutter Developer

Convivial Software Pvt. Ltd. — Pune Jan 2020 – Dec 2021

- Independently built and maintained features for SocietyRun, a Flutter-based housing-society management application.
- Implemented application modules covering complaints, announcements, meetings, visitor management, maintenance billing, document downloads, and notifications.
- Integrated Razorpay and Paytm payment gateways for maintenance and billing workflows.
- Worked on application UI, business logic, API integration, debugging, and production support.

Android Developer

SSM InfoTech Solutions Pvt. Ltd. — Surat Oct 2016 – Mar 2019

- Developed multiple native Android applications for industrial and field-service workflows.
- Developed E-Logsheet, an offline-first industrial application developed for GAIL, supporting location-based login, shift readings, draft saving, background synchronization, and daily report generation.
- Developed Rallis E-Logsheet, supporting online/offline batch reading, local draft management, and synchronization with the live server.
- Built X-Docx Android, a configurable product platform driven by database-defined product structures, together with its MVC-based Web API.
- Developed Instrument Tracking System (ITS) for instrument tracking, job generation, supervisor approval/rejection workflows, and notifications.
- Developed Complaint Management System (CMS) with photo/video capture, complaint tracking, notifications, and in-app communication.
- Built X-info, a field-employee companion application supporting schedules, customer visits, customer/account capture, and expense tracking.
- Worked on application design, Android implementation, API integration, offline functionality, debugging, and production support.

Android Developer

3Fusion — Surat Feb 2016 – Aug 2016

- Contributed to the development of SareeSaga, an Android-based e-commerce application.
- Worked on mobile application development and integrated payment functionality including CCAvenue and PayPal.

SELECTED PROJECTS

Ezglish — Multilingual Language Learning Application

Technology: Flutter, Dart, REST APIs, TTS, STT, Zoom Video SDK | Client: UK

- Independently designed and built the Flutter application and delivered features across the product lifecycle.
- Implemented interactive language-learning functionality including hotspot images, multilingual content, text-to-speech, speech-to-text, word-level highlighting, and tap-to-translate.
- Built Listen–Repeat–Compare pronunciation practice functionality with real-time pronunciation scoring.
- Integrated video communication functionality using a third-party Zoom video SDK.
- Implemented social-sharing functionality and supported production feature enhancements and troubleshooting.
- Worked directly with the international client to understand requirements and deliver application features.

Depotnet — Workforce & Job Management Platform

Technology: Native Android, Java | Client: UK

- Maintained and enhanced 20+ native Android applications.
- Implemented feature enhancements, bug fixes, and issue resolution across applications including Kier Intercom, City Fiber, ONSA, Enerveo, and HSEQ.
- Supported production applications covering job management, contracts, workforce workflows, and field operations
- Delivered feature enhancements, maintenance fixes, and production support across multiple applications.

SocietyRun — Housing Society Management Application

Technology: Flutter, Dart, REST APIs, Firebase, Razorpay, Paytm

- Independently built and delivered the Flutter application.
- Implemented modules for complaints, announcements, meetings, visitor management, and maintenance billing.
- Integrated Razorpay and Paytm payment gateways.
- Implemented Firebase-based authentication and push notifications.
- Worked on UI, application logic, API integration, debugging, and production releases.

E-Logsheet — Industrial Offline-First Application

Technology: Android, Java, SQLite, REST/Web APIs | Client: GAIL

- Developed an offline-first application for replacing paper-based industrial shift readings.
- Implemented location-based login, draft saving, local data handling, and background synchronization.
- Supported daily reporting by synchronizing field data with the live server.
- Received client appreciation for the delivered solution.

X-Docx Android — Configurable Product Platform

Technology: Android, Java, SQLite, MVC Web API

- Built a configurable Android platform where client applications could be generated through database-driven product configurations.
- Built the complete Android application and MVC-based Web API.
- Designed functionality to support configurable product structures and reusable application workflows.

SareeSaga — Indian Ethnic Wear E-Commerce App

Technology: Android, Java, MVC Web API

- Built a native Android e-commerce storefront for Indian ethnic wear, including sarees, salwar kameez, and lehenga choli.
- Integrated web-based payment functionality using CCAvenue and PayPal for secure checkout.
- Built the complete application independently, from UI design through payment integration.

EDUCATION

B.E. — Computer Science & Engineering

Gujarat Technological University (GTU) | 2015 | CGPA: 7.20

ACHIEVEMENTS

- Received client appreciation for work delivered on the GAIL E-Logsheet project.
- Received client appreciation for contributions to the Ezglish project.
- 2nd Runner-Up, C-Quest Event, Vishvesmruti-2K14, RNGPIT College.
